Haws® and ThermOmegaTech® Join to Offer Ultimate Steam Water Heater Solution

[Sparks, Nevada USA] – Haws Corporation®, a global plumbing and emergency response manufacturing company has entered into an exclusive manufacturing and distribution agreement with ThermOmegaTech®, a design and manufacturing leader in self-actuating temperature control valves. With this new agreement, *Haws* now will serve as the primary source for instant steam heated tepid water systems and is pleased to offer the updated [AXION® Steam Water Heater](#). This *Haws* model 9400 will be available to ship in the fourth quarter 2014 and offers all the great features of the original product as well as innovative new features, including:

- ASSE 1071 certified mixing valve designed for safety shower and eyewash applications to deliver 80°F (27°C) water.
- Over-temperature bleeder valve on the outlet to ensure water temperatures are below the ANSI Z358.1 defined maximum temperature of 100°F (38°C).
- Steam bleed valve allowing the unit to be installed in temperatures down to -30°F (-34°C).

In addition to longevity in standard emergency response products, *Haws* has many years of experience inventing, engineering, and manufacturing customized tepid water supply products for a multitude of climates and facility environments. *ThermOmegaTech* continues to be the source for all other self-operating temperature actuated valves used to control flow of water, steam, air, and other fluids.

About Haws Corporation®

For more than 100 years, *Haws* has been committed to inventing, designing and manufacturing drinking fountains as well as standardized and customized emergency response products. With more than 8,000 distribution locations and 250 employees worldwide, we continually focus on quality, service, reliability and complete solution support. Headquartered in Sparks, Nevada, USA, *Haws* is globally represented with locations in Switzerland, Singapore and Brazil. For more information on *Haws Corporation*, please visit www.Hawscos.com.

About ThermOmegaTech®

Headquartered in Warminster, Pennsylvania *ThermOmegaTech, Inc.* has been a world leader in the design and manufacture of self-actuating temperature control valves. Serving a multitude of industries has resulted in creative valve solutions for a wide gamut of applications. *ThermOmegaTech, Inc.* has been the standard for the rail industry for over 30 years protecting billions of dollars of equipment every year.
