Toxic Substances Control Act (TSCA) Declaration

On January 6, 2021 in the federal register 86 FR 866-932, the U.S. Environmental Protection Agency (EPA) published a list of five final rules to reduce exposures to certain chemicals known to be persistent, bio-accumulative, and toxic (PBT). These five substances collectively make up what is known as Section 6(h) of the Toxic Substance Control Act. As of 2022, the five PBT chemicals still are:

- 1) Pentachlorobenzenethiol
- 2) Decabromodiphenyl ether [decaBDE]
- 3) Isopropylphenyl phosphate (3:1)
- 4) 2,4,6-Tri-tert-butylphenol
- 5) Hexachlorobutadiene

Please be advised that, to the best of our knowledge, **ThermOmegaTech, Inc.** products comply with all applicable regulations under the TSCA. The information gathered from our vendors confirms that these substances are not present in any of the parts used in our manufacturing process.

ThermOmegaTech, Inc.

A handwritten signature in blue ink, appearing to read "Fred Guevara", is written over a light blue horizontal line.
